

ABSTRACT OF THE DISCLOSURE

A primary and secondary game for a wagering gaming machine. In one embodiment, the number of lines wagered or a slot machine makes the player eligible for a bonus game, and a wager made per payline effects how many
5 moves or positions on a meter the player advances upon achieving the bonus triggering symbol or combination of symbols. When the player advances the meter to the end, the gaming device displays a payout event. The payout event can be any type of bonus gaming event that potentially provides an award to the player.
